SPRAY CHILL

Spraying Systems Co.® presents our proven chill loss prevention solution for European meat processors with the **AutoJet® Spray Chill System**. By upgrading your existing chill system with this EU-proven solution, you can effectively eliminate carcass moisture loss and shrinkage.

THE AUTOJET® SPRAY CHILL SYSTEM IS DESIGNED TO ALIGN WITH OUR CUSTOMERS' REQUIREMENTS FOR QUALITY, SAFETY, AND SUSTAINABILITY.

BENEFITS

- Carcass moisture loss reduced or eliminated (depending on individual application).
- Carcass shrinkage reduced leading to higher yield in the deboning process.
- More efficient cooling of the carcasses - reduced energy cost and increased cooling capacity.
- Customers report that the AutoJet® SprayChill System makes the cold deboning process significantly easier with an additional yield, and shrinkage eliminated
- Our AutoJet® spray chill system has an **average ROI of 6 months**.

» Evaporative weight loss is reduced when our spray chill system is installed.

HIGHLIGHTS

Seamless upgrade for existing chill systems, ensuring enhanced performance and efficiency

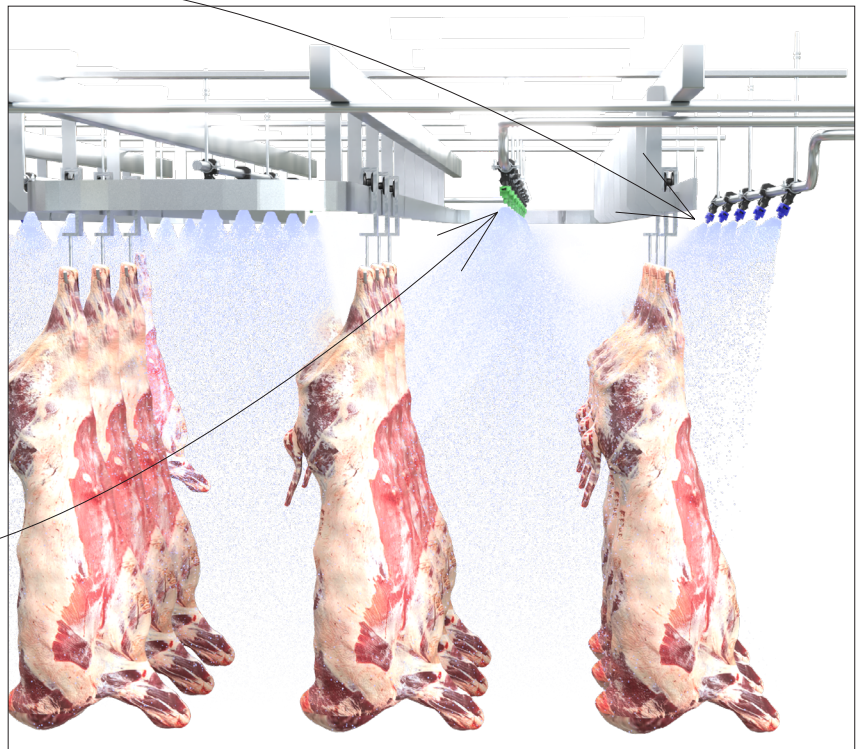

Water conservation: less waste

Precision control with targeted spray: each chill room can be regulated separately

CIP (Cleaning In Place): optimized hygiene

Moisture Loss Prevention

Customizable controller with remote monitoring
